Education

Presidency College , Bengaluru

2023 - 2027

Bachelor of Technology in Information Technology

CGPA: 7.6

Technical Skills

Languages: Python, JavaScript, TypeScript, SQL,

Frameworks and Libraries: React.js, Next.js, Node.js, Express.js, Redux, Tailwind CSS, ShadCN

Development Tools: Turborepo, Monorepo, Prisma, WebSocket, Axios, Git, GitHub, Postman

Database: MongoDB, MySQL, PostgreSQL, RDS.

Cloud and DevOps: AWS, Docker, Kubernetes

APIs: REST API, GraphQL, OpenAI API, Gemini API

Professional Experience

FlexForce.ai

August 2024 – Feb 2026

Full-Stack Developer, **Remote (New York, NY)**

- Developed a multi-tenant CMS using **Payload CMS (Node.js, MongoDB)** with domain-based tenant detection, RBAC, and secure REST API integrations.
- Built a dynamic **Next.js** front-end with tenant-specific routing, integrated with headless CMS content and optimized for SEO, performance, and responsiveness.
- Designed scalable content models (Users, Tenants, Pages) and implemented custom authentication hooks, dynamic CORS, and admin panel customizations.
- Contributed to a SaaS-ready architecture with clean code, agile collaboration, and CI/CD workflows on **Vercel**.
- Tech Stack: Payload CMS, Node.js, Next.js, TypeScript, MongoDB, REST APIs, Vercel, Git, Agile.

TechPioneers Romania

August 2023 – August 2024

Fullstack Web Developer, **Remote • Cluj-Napoca, Romania**

- Built and maintained a scalable event planning web application using **React** and **Node.js**.
- Developed RESTful APIs and integrated third-party services including payment gateways, authentication, and calendar APIs.
- Collaborated with design and product teams to deliver responsive UI and advanced features like 3D rendering and AI-driven recommendations.
- Ensured application security, performance, and efficient CI/CD workflows in an agile startup environment.
- Tech Stack: React, Node.js, REST APIs, SQL/NoSQL databases, Payment Gateways, 3D rendering, AI integration, Agile, CI/CD.

Projects

AI Engine – *Next.js, TypeScript, OpenAI API, Anthropic API, Tailwind CSS, Node.js*

[GitHub](#)

- Built an AI-powered application platform integrating Anthropic API for intelligent workflows and AI-assisted interactions.
- Developed a scalable frontend architecture using Next.js and TypeScript with reusable UI components and modular API handling.
- Implemented real-time AI interactions and asynchronous workflows, improving responsiveness and overall developer experience.

AI Developer Workspace - *Next.js, TypeScript, React, Tailwindcss, ShadCN, Convex*
[GitHub](#)

- Developed a web-based IDE using Next.js 15, Convex, and Clerk with support for 10 programming languages.
- Features include customizable VSCode themes, smart output handling, code-sharing, and execution history tracking.
- Integrated webhook support and flexible Free Pro plans for enhanced developer experience.

Brainly App – *React, TypeScript, Node.js, Express.js, MongoDB, Zod, Tailwind CSS*
[GitHub](#)

- Developed a personalized link management system for storing and categorizing YouTube videos, Twitter links, documents, and more.
- Implemented tag-based filtering and sidebar navigation, enabling quick access to categorized content.
- Integrated share functionality, allowing users to generate unique links for sharing their collection securely.

Web Wallet - *Next.js, TypeScript, Solana Web3.js, Tailwind CSS, Node.js*
[GitHub](#)

- Built a web-based crypto wallet supporting secure wallet generation and multi-account management for Solana-based assets.
- Implemented mnemonic phrase generation, wallet derivation, and private key handling using Solana Web3.js and modern cryptographic workflows.
- Developed a responsive frontend interface with reusable components and optimized wallet interaction experience using Next.js and TypeScript.
